DETAILED ACTION

Claim Objections

1. Claims 5, 15, and 16 are objected to under 37 CFR 1.75(c), as being of improper dependent form for failing to further limit the subject matter of a previous claim.

The claims amount to double inclusion of "window or door" and "frame" structure already included by the independent claims. Claim 1 for example includes several limitations (see below) that singly, and especially taken together in context of the claim as a whole, can only be interpreted as positively reciting the "window or door" and "frame" defining the "opening" as part of the claimed invention.

"latch assembly for closing a door or window opening to a fixed frame" - functional recitation that does not *necessarily* include the "opening" or "frame" elements

"said keeper being mounted to one side of said opening" - unambiguously requires scope of claimed invention to include "the opening" in a particular combination and arrangement

"respective pairs,..., being relatively coaxially disposed and opposed across said opening in the open and closed condition of said door or window" - unambiguously requires scope of claim to include specific geometry of "door or window" and "frame" elements in combination

"said latch structure being mounted to the other side of said opening" - unambiguously requires scope of claimed invention to include "the opening" in a particular combination and arrangement

Claim 10 includes similar positive recitations of structures that are doubly included in the indicated dependent claims. See also MPEP 2173.05(o). In this case, clarification and/or correction is required.

Double Patenting

1. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

2. Claims 1-20 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-4 of U.S. Patent No. 6,637,784 to Hauber. Although the claims are not identical to those of the Patent, they must be interpreted as being drawn to the same invention when properly read in light of the specification.

Conclusion

3. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
